About Us

As a leading plastic injection molder based in Wisconsin **since 1977**, we specialize in providing comprehensive expertise across various aspects of injection molding. Our team of professionals excels in a range of techniques, including over molding, in-mold labeling, multi-shot molding, decoration, and insert molding. Central to our operations is a strong emphasis on automation and robotics, forming the backbone of our commitment to enhancing efficiency and delivering dependable solutions, particularly for **mid to high-volume** product requirements.

Our in-house engineers work from **concept** to **production** to build custom work cells, outfitted with the latest technology.

Why Choose Us?

- ★ Quality
- ★ 98% OTIF
- ★ Customer Service
- ★ ISO Class 8 Cleanroom
- ★ ISO 9001
- ★ ISO 14001
- ★ ISO 45001
- ★ ISO 13485

Our Services

1

In-Mold Label & Decoration

We can help transform your worn, peeled, bubbled, labels with an in-mold label that will last the life of the part so your brand never wears.

2

Insert & Two-Shot Molding

We are capable of transforming your product by taking it to the next level with a soft-touch grip, threaded insert, and so much more.

3

Fulfillment

We offer a range of fulfillment and third-party logistics services for either your WIP or fully-assembled packaged goods.

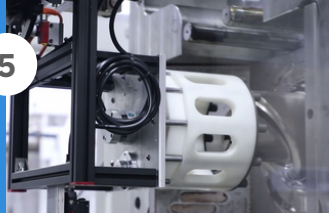

4

Assembly

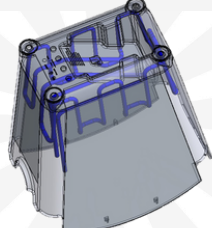

Fully automated assembly, partially automated, or manual assembly are all in our wheelhouse. Every option is considered throughout the design phase.

5

In-House Automation

What sets Sussex IM apart is our in-house automation team and robotics capabilities. The sky is the limit with our team and automation experience.

6

Design for Manufacturing

We can help you implement design changes, improve molding efficiency and repeatability with our team of engineers.
